Full-Stack Software Engineer

A Full-Stack Software Engineer with experience in developing React, Redux, and Ruby-on-Rails web applications. Adaptable and driven with a strong work ethic, always looking to build and grow scalable applications that solve real-world problems. I bring strong skills in research, debugging, and communication to the team with experience in leadership and the desire to help others. Leadership mentality of being in a lead position has shown me that I love to learn and teach skills I have developed over time. Ability to thrive in a flexible team environment, demonstrate critical decision-making skills, and have strong interpersonal and communication abilities. All of which stem from my 8 years experience working in the Hospitality Industry.

Technical Skills
